

MERIEM ABUBEKER

Senior Software Test Engineer

Addis Ababa, Ethiopia • +251 912 657 852 • bintabibekr@gmail.com • [LinkedIn](#) • [GitHub](#) • Portfolio: attuue.github.io

◆ PROFILE

Senior Software Test Engineer with 10+ years of experience delivering high-quality enterprise software across FinTech, ERP, SaaS, AI-driven, web, and mobile applications. Skilled in functional, exploratory, integration, API, database, performance, and security testing across the full SDLC. Proven track record designing test strategies and building scalable automation frameworks with Playwright, Cypress, Selenium, Appium, and Rest Assured. Actively leverages AI tools — Claude, ChatGPT, GitHub Copilot, and Cursor — to accelerate test case generation, test data creation, and automation code development. Deep domain expertise in cross-border remittance, digital lending, payment processing, and large-scale ERP systems.

◆ CORE SKILLS

Functional Testing	Integration Testing	System Testing	Regression Testing
UAT	Exploratory Testing	API Testing	Database Testing
Performance Testing	Security Testing	Mobile Testing	Playwright
Cypress	Selenium WebDriver	Appium	Rest Assured
Serenity/Cucumber	JMeter	k6	OWASP ZAP
Burp Suite	Postman	Java	Python
TypeScript	Oracle	PostgreSQL	MongoDB
SQL	Jira	Xray	Zephyr
TestRail	TestLink	Docker	Jenkins
Git/GitHub	SonarQube	JFrog Artifactory	GlassFish

◆ PROFESSIONAL EXPERIENCE

Oct 2025 – Present

Addis Ababa, Ethiopia

Senior QA Engineer

Roamtech Solutions

QA consultant delivering testing services across multiple client engagements.

Project: Emalify — SaaS Platform with WhatsApp Business API Integration

- Tested WhatsApp Business API template creation, validation, and message delivery to clients using approved templates.
- Validated the 24-hour client messaging window, including chat expiry and automatic resumption once the client sends a new message.
- Tested conversation assignment workflows, verifying chats were correctly routed to and picked up by support agents.

Project: TumaTuma — Cross-Border Remittance Platform

- Developed functional, integration, regression, and end-to-end test cases for cross-border remittance workflows.
- Validated money transfers, exchange rate calculations, transaction fees, and payout status updates.
- Performed API testing for remittance, KYC/ID verification, and payment integrations; verified WebSocket and webhook flows.
- Executed database validation for transaction integrity and conducted exploratory testing on payment edge cases.

Project: Senti — Micro-Credit Platform

- Validated onboarding, loan application, approval, disbursement, repayment, and reconciliation workflows.
- Tested administrative CRB and compliance processes; verified RBAC across modules.

Apr 2023 – May 2025

Addis Ababa, Ethiopia

Senior QA Engineer

Gebeya Inc

Project: Gebeya SaaS Marketplace (GSaaS) — a multi-tenant SaaS marketplace enabling rapid tenant onboarding

- Defined acceptance criteria with product owners and developers during sprint planning and backlog grooming.
- Tested multi-tenant provisioning, role-based access control (RBAC), and user permission workflows.

- Managed Xray test sets in Jira across integration, functional, system, regression, and E2E testing.
- Validated Figma-to-build UI parity and cross-device responsiveness.
- Validated REST APIs using Postman and performed database verification to ensure data integrity.
- Automated API suites with Cypress/TypeScript.
- Automated smoke and regression test suites in Cypress/TypeScript.

Project: Safaricom Talent Cloud – end to end talent development platform

- Validated and tested the Pluralsight integration by creating data-driven test scenarios to verify learning-path progress.
- Executed end-to-end tests for Discord-based coaching workflows.
- Validated SAML-based SSO flows for seamless, secure access to Pluralsight.

Apr 2023 – Aug 2023

Addis Ababa, Ethiopia

Senior Performance Engineer

Safaricom Ethiopia

- Modeled real-world transaction mixes and concurrency levels into JMeter thread-group configurations.
- Developed and parameterized JMeter test plans; executed load, stress, and soak tests at peak volumes.
- Analyzed throughput, response times, and error rates to pinpoint bottlenecks.
- Delivered performance reports with trend analyses and SLA compliance summaries.

Aug 2019 – Apr 2023

Pittsburgh, PA, USA (Remote)

Senior Software Tester

Excellerent Solutions

Project: Presence Browser Suite — Multi-product ecosystem for web-based community building (Chrome extension, web app, embeddable SDK)

- Designed and ran API and UI automation across all three components and executed OWASP ZAP security scans.
- Built API automation with Rest Assured/Java/Cucumber.
- Ran performance testing (smoke, load, stress, spike, soak) with k6.
- Executed OWASP ZAP and Burp Suite security assessments with remediation recommendations.
- Mentored QA team members on best practices, tooling, and automation strategy.

May 2015 – Aug 2019

Addis Ababa, Ethiopia

Software Tester

Information Network Security Agency (INSA)

Project: ERP System — Modular enterprise system covering HR, Finance, and Asset Management

- Reviewed requirements and technical design documents, improving testability through actionable feedback.
- Performed Oracle database validation using SQL.
- Built a CI/CD pipeline: Jenkins + GitLab + GlassFish + JFrog Artifactory, with SonarQube quality gates.
- Built a Selenium WebDriver automation framework in Java from the ground up.

◆ EDUCATION

BSc in Software Engineering

Microlink Information Technology College, Addis Ababa, Ethiopia — 2014
